## Material Safety Data Sheet

**Catalog Number:** F145

**Product Name:** *Pichia pastoris* HCP Western Blot Kit

*The below information is believed to be correct but may not be all inclusive. It is intended to be used as a guide. You, as the user, should independently verify the suitability and safety of the product under your conditions of use. Cygnus Technologies, Inc. shall not be liable or responsible for the use of this information or the material supplied and thus the user shall assume all risk in the use of the product. Disposal of hazardous material may be subject to local, state or federal regulations.*

### Description of Contents:

**Anti-*Pichia pastoris*:Horseradish Peroxidase, Product # F147**

Affinity purified goat antibody conjugated to horseradish peroxidase

Proclin 300 preservative

NaCl, (sodium chloride)

Tris {hydroxymethyl}-aminomethane

***Pichia pastoris* Control Antigen, Product # F146**

Solubilized *Pichia pastoris* Host Cell Proteins

Proclin 300 preservative

**TMB Substrate, Product # F129**

3,3', 5,5' Tetramethylbenzidine

**Block/Wash Concentrate, Product # F062**

Tris {hydroxymethyl}-aminomethane, 1M, pH 7.5

Protein blockers/stabilizers

Proclin 300 preservative

### Hazardous Ingredients:

Only the ingredients listed below have any known toxicities. For the other materials shown above no biological hazard has been established. At the concentrations used the hazards are minimal, however this kit should only be used by experienced laboratory personnel trained in the proper techniques and general laboratory safety. The following procedures apply for all components of this kit.

**General Toxicological Information -** Inhalation of any aerosols from these components may induce sensitization and cause allergic reactions in sensitized individuals.

#### First Aid Measures -

**Skin Contact:** Wash skin with soap and water. If symptoms occur consult a doctor.

**Eye Contact:** Rinse eyes with water for 10 minutes and contact a doctor.

**Ingestion:** Rinse mouth and throat with water and consult a doctor.

**Inhalation:** Exit from exposure area. If symptoms of irritation, sensitization or if breathing difficulties occur, contact a doctor.

**Fire fighting measures:** No special requirement. Water or foam are suitable. There are no special exposure hazards.

**Accidental release procedures:** Spilled material should be absorbed into paper or cloth towels with the area washed with water. Avoid splashing or aerosolization. Ensure sufficient ventilation.

**Handling and storage:** Store at 2°C to 8°C. Avoid aerosolization.

**Exposure controls and personal protection:** Wear impermeable gloves, protective eye wear.

**Disposal:** Dispose in accordance with local, state, and federal regulations. Sodium azide in high concentration can react with heavy metals such as lead & copper to form explosive metal azides. When disposing down the drain, flush with generous amounts of water to avoid build up of metal azides.

**Hazardous Chemicals:**

**1. Tris{hydroxymethyl}-aminomethane**

- Irritant to eyes, respiratory system, and skin

**2. NaCl (sodium chloride)**

- May be toxic if ingested in large quantities
- May cause irritation when contacted with eyes or skin
- Avoid inhalation

**3. 3,3',5,5'-Tetramethylbenzidine (TMB)**

- Mutagenic effects seen in laboratory experiments

**4. Proclin 300 Preservative**

- Irritant to eyes, respiratory system, and skin
