Material Safety Data Sheet

Catalog Number: F213A

Product Name: Goat IgG Sample Diluent

The below information is believed to be correct but may not be all inclusive. It is intended to be used as a guide. You, as the user, should independently verify the suitability and safety of the product under your conditions of use. Cygnus Technologies, Inc. shall not be liable or responsible for the use of this information or the material supplied and thus the user shall assume all risk in the use of the product. Disposal of hazardous material may be subject to local, state or federal regulations.

Description of Contents:

Goat IgG Sample Diluent, Product # F213A (-100, -500)

Tris HCl

Tris Base

NaCl

hIgG

Proclin 300 preservative

Hazardous Ingredients:

This diluent contains purified human IgG derived from human serum. The source material has been tested by FDA approved methods and has been found negative for antibody to human immunodeficiency virus (HIV-I & HIV-II), antibody to Hepatitis C virus, and for Hepatitis B surface antigen. No known test method can offer total assurance that HIV, Hepatitis B and C, or other infectious agents are absent. *Handle these reagents as if they were potentially infectious.*

Only the ingredients listed below have any known toxicities. For the other materials shown above no biological hazard has been established. At the concentrations used, the hazards are minimal, however this product should only be used by experienced laboratory personnel trained in the proper techniques and general laboratory safety. The following procedures apply for this product:

General Toxicological Information - Inhalation of any aerosols from these components may induce sensitization and cause allergic reactions in sensitized individuals.

First Aid Measures -

Skin Contact: Wash skin with soap and water. If symptoms occur consult a doctor.

Eye Contact: Rinse eyes with water for 10 minutes and contact a doctor.

Ingestion: Rinse mouth and throat with water and consult a doctor.

Inhalation: Exit from exposure area. If symptoms of irritation, sensitization or if breathing difficulties occur, contact a doctor.

Fire fighting measures: No special requirement. Water or foam are suitable. There are no special exposure hazards.

Accidental release procedures: Spilled material should be absorbed into paper or cloth towels with the area washed with water. Avoid splashing or aerosolization. Ensure sufficient ventilation.

Handling and storage: Store at 2°C to 8°C. Avoid aerosolization.

Exposure controls and personal protection: Wear impermeable gloves, protective eye wear.

Disposal: Dispose in accordance with local, state, and federal regulations.

Hazardous Chemicals

1. Tris{hydroxymethyl}-aminomethane

- Irritant to eyes, respiratory system, and skin

2. NaCl (sodium chloride)

- May be toxic if ingested in large quantities

- May cause irritation when contacted with eyes or skin

- Avoid inhalation

3. Proclin 300 Preservative

- Irritant to eyes, respiratory system, and skin
